### Books Descriptions

- Computational Design offers an informed overview of the impact of computational techniques on architectural design today, providing a snapshot of the latest developments in the field, drawing upon the leading experts in architectural practice and education from across the world - Publication accompanies that of a companion volume - Digital Fabrication ISBN 9787560873343 How are computational techniques changing the ways in which architects are designing buildings today? Computational Design offers a range of informed opinions on the subject written by some of the leading authorities in the world. It addresses parametric and algorithmic design, along with other related subjects, such as swarm intelligence, artificial intelligence,

machine learning, interactive design, video gaming, building information modelling, geographic informational systems, remote sensing and data visualisation. The volume is divided into different sections comprising Manifestos, Methodologies and Projects,
