Books Descriptions

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent "grand design" of our universe evidence of a benevolent creator who set things in motion? or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations

in the early universe, and show how quantum theory predicts the
?multiverse??the idea that ours is just one of many universes that appeared
spontaneously out of nothing, each with different laws of nature. They conclude
with a riveting assessment of M-theory, an explanation of the laws governing
our universe that is
